Special note

This is a deceptively difficult problem to solve. Students are warned that the instructors believe this to be the most difficult of the proposed Capstone projects and as a result carries the greatest risk of not completing a working project.

Days and times

As an Administrator I can configure available days and time slots, defining meeting length and distribution of break periods.

Ranking system

As an Administrator I can choose how a Student selects or ranks companies. Possible ranking schemes include: select top four Employers, rank all Employers, distribute x points among y Employers.

Employer Profiles

As an Employer I can add content to my company's profile page so that students are interested in interviewing with my company

Employer Teams

As an Employer I can indicate how many teams I am sending to matchmaking, what days they wish to attend, and any other appointment restrictions.

Student Ranking

As a Student I can rank Employers so that I can interview with the companies I am most interested in.

Student Schedule

As a student I can view my schedule of interviews

Employer Schedules

As an administrator, I can view or print a schedule for any employer.

Scheduler

As an administrator I can run the scheduling process with over-rides in place so that I can fix conflicts and fill gaps.
