User Stories

List

As a User, I need to be able to see a list of songs depending on their mood

Details

As a User, I need to be able to click on a list to expand the details

Back

As a User, I need to be able to click back on a title to go back to the list

Search

As a User, I need to be able to search for songs via mood

Filter

As a User, I need to be able to filter events based on mood. Moods can include Sad, Happy, Party, Broken Up With, Celebratory, Work Out, Commute, Date Night

Login

As an Administrator, I need to be able to log in to authorize their use of the system.

Admins

As an Administrator, I need to be able to create additional administrators.

Edit

As an Administrator, I need to be able to edit their own information, including artist, genre, mood, songs, and user.

Edit List

As an Administrator, I need to be able to add, view, edit, and delete their current list in the program. Moods and genres to include: name, an image, a description, Genre name

Resources

As an Administrator, I need to be able to create and edit resource types

Spoken

(Optional) As a User, I need to be able to have the information spoken out loud to them, as opposed to having to read it

Languages

(Optional) As a User, I need to be able to have a choice of language(English, Spanish, etc.), (spoken and written)

Statistics

(Optional) As an Administrator, I need to be able to see how often event information has been accessed over the past day, week, or month

Concerts

(Optional) As a User, I need to be able to use an external API to calculate the distance between zip codes to find the closest matching concert.
