

Sensei

Description

Sensei (or Kyoushi) is a web application that connects Senseis (or Kyoushis) (teachers) and Grasshoppers (students). The topics/subjects of what is taught is completely up to the Senseis and Grasshoppers to decide. Each Sensei and Grasshopper has their own respective account and profile. A Sensei's profile would display their profile picture, their short bio with the experience they have in a given subject, the subject/subjects they teach, their current ratings/reviews given by grasshoppers from the past, when and where they plan to teach future classes, how many grasshoppers they are accepting for each respective class, and what the cost for each class would be. A Grasshoppers profile would display their profile picture, their short bio, subject/subjects they have interest in, classes they've taken in the past, ratings/reviews from past Senseis. There would be a browse Sensei's option for Grasshoppers to use. By browsing the Grasshoppers would be able to view Senseis, and the classes they offer, within a geographical area defined by the Grasshopper. There would also be a search Sensei's option so that Grasshoppers could specifically look for Senseis teaching within a subject matter they are interested in.

The app would charge a small monthly subscription fee for Senseis since they would be profiting from using the app. The Grasshopper account would be a free account since they are creating the market.
